Summary information

Repository:	Arthur H. Aufses, Jr., MD Archives
Title:	Arthur Sohval, MD papers
Reference code:	AA037
OCLC Number [alternative]:	882088731
Date:	1936-1981 (date of creation)
Physical description:	3 boxes (23 inches)
Language:	English
Dates of creation, revision and deletion:	Finding aid last updated June 2010.

Administrative history / Biographical sketch

Note

Arthur Sohval, MD (1904-1985) was a distinguished endocrinologist who specialized in disorders of the human reproductive system. He published many articles on a wide variety of endocrine topics and pioneered the use of electron microscopy to study and diagnose gonadal disorders. Dr. Sohval was associated throughout his career with The Mount Sinai Hospital and Mount Sinai School of Medicine. Born in New York City in 1904, Sohval was educated at Columbia. In 1924 he received a B.A. in Chemistry and Biology from Columbia College, and in 1929 he received both an M.A. in Chemistry from Columbia University and an M.D. from the Columbia University College of Physicians and Surgeons. He then began a two-year rotating internship at Mount Sinai Hospital that was followed by a two-year research fellowship. In 1933 he became a researcher in cardiovascular pathology, and in 1938 he became an Assistant Attending Physician. In 1955 he became an Associate Attending Physician. From 1958 to 1963 Dr. Sohval taught at the Downstate Medical Center of the State University of New York at New York City, and when Mount Sinai School of Medicine was founded, he became an Associate Clinical Professor of Medicine. In 1973 he became Clinical Professor Emeritus. During the 1970s Dr. Sohval also served as a consulting cardiovascular physician for the New York Police Department. He was awarded the Jacobi Medallion in 1980. He died in 1985.

Dr. Sohval was the author or coauthor of numerous publications on the subject of gonadal endocrinology.

Scope and content

This collection consists primarily of subject files maintained by Dr. Arthur Sohval on various disorders of the gonads. Most files contain Dr. Sohval's research notes alongside associated research material. Many files also contain draft manuscripts of Dr. Sohval's published articles. The research material in each file typically consists of annotated journal clippings, but it sometimes includes photographs (standard and microscopic), case histories, and correspondence with other physicians. Conditions represented include cryptorchidism, Klinefelter's syndrome, cell tumors, and various forms of intersexuality and gonadal dysgenesis. The collection also contains several files documenting Dr. Sohval's grant applications for his studies in electron microscopy of the gonads.
