

Dear Overholts.

The chapter on constipation in my little book on the Intest.
Dis. is very good. My "conjugate constipation" for instance taught
30 years ago is about being accepted (see last number of revue
mensuelle). If you have no copy let me know, it will give me
pleasure to supply you.

Your patient will require treatment, with enema and gentle
massage. Perhaps later strychnia.

I am very anxious to know - not having fuller sample notes -
what was the former diet of your patient.
Was it sterilized milk, cow's milk, boiled milk, and how given,
pure, mixed with water, or what?

Yrs truly
A. Parvizi
