

To The Supervisory Committee
O.D. Dept. Mt Sinai Hospital.

The undersigned desire to call your attention to the Report of the diseases treated in the Out Door Department of the Hospital as printed in the Annual Report.

With one or two exceptions no 'proof' was sent to the authors of the various portions of said Report and as a consequence there occur so many typographical errors in the Report as to render it entirely worthless as a record of professional work done in that department of the Hospital;

the proportion of errors being
as 50 to 1 and the report as
printed contains such a jumble
of impassible words that
it will draw ridicule upon
the hospital or at least upon
those under whose auspices
it is supposed to be compiled.

Your committee respectfully
^{suggest}
that in future, ~~reports~~, precautions
shall be taken by sending
proof from the printer to the
authors of the Report and
that such other measures be
adopted as will secure
correct printing of the reports
same which are themselves
so troublesome to prepare

C Williams
Committee

My name as one of the
Physicians of the outdoor
Department is incorrectly
printed in the last reports
for the last three years
though I called the attention
of the officers of the hospital
to the fact several times.
C Williams
